

AYSE SULE EKIZ

Houston, TX · ase2327ekiz@gmail.com · [LinkedIn](#) · [GitHub](#) · [Portfolio](#) · [Devpost](#)

EDUCATION

North American University — B.S. Computer Science | GPA 3.95

Aug 2024 – May 2027

Coursework: Data Structures & Algorithms, Full-Stack Application Development, Database Systems, Big Data Analytics, Data Mining, Data Visualization, ML & Big Data, Operating Systems, Software Engineering, Statistics, Systems Programming, Computer Networks
Leadership & Honors: President's Honor Roll · President, ACM-Women · GDSC Lead · President, Design Club · VP, Art Club

Robert College — Turkey's Premier American High School (est. 1863) | GPA 3.85

Aug 2018 – May 2023

EXPERIENCE

ForgeMind — Software Engineering Intern

Feb 2025 – Jul 2025

- Learned and built Python ETL pipelines alongside senior engineers, pulling from APIs, web scrapers, and transactional databases into a staging area, then cleaning, validating, and standardizing the data for downstream analytics.
- Wrote complex SQL (joins, window functions, cohort analysis) to map feature adoption funnels and session engagement patterns; findings shaped product prioritization decisions directly.
- Profiled and optimized underperforming queries, reducing dashboard load times in weekly executive reviews.
- Owned the full cycle from stakeholder brief to live dashboard, translating ambiguous product questions into data models, KPIs, and presentations iterated on in executive reviews.

North American University — IT & Design Associate

Sep 2024 – Present

- Drove product development for the NAU Athletics website and student portal, user research, journey mapping, UI delivery, and developer handoff, shipping a platform used daily across campus.
- Built a Figma design system with reusable components adopted across campus platforms, standardizing accessibility and eliminating redundant design work.
- Conduct ongoing usability testing and track ad-conversion performance across social channels, translating findings into product requirements acted on by administrators.
- Automated reporting workflows in Python, cutting 60% of manual data processing and enabling staff to act on live data.

Koç University — AI Research Intern

Jun 2022 – May 2023

- Built end-to-end Python pipelines for a 2D-to-3D AI system, data preprocessing, labeling, model evaluation, and iteration, reducing manual overhead for graduate researchers.
- Designed and built interactive JavaScript visualizations that made complex ML spatial transformations legible for non-technical audiences in live demos and research presentations.

PROJECTS

Obi: AI Desktop Assistant — LA Hacks 2026 · Figma UI Challenge Winner — [Project Link](#)

Apr 2026

- Engineered a cross-platform assistant in 36 hours: Electron + Vite shell, locally-run Gemma LLM, and a custom RAG pipeline, sub-second contextual responses with no cloud dependency, fully local search agent, desktop assistant.
- Won by designing an interaction model that made the AI feel immediate and human; judged production-ready.

OpenStaxAlign: Curriculum Mapping Tool — Rice Datathon 2026 · 2nd Place — [Project Link](#)

Jan 2026

- Built the full ML pipeline, JSON ingestion, TF-IDF vectorization, Logistic Regression baseline, Linear SVM, reaching 75% accuracy on multi-class educational standard prediction.
- Designed the MongoDB schema and built all analytics views; the final presentation translated raw model outputs into a narrative curriculum story that placed 2nd out of all competing teams.

NAU Athletics & Student Portal — Full-stack platform · live in production — [Project Link](#)

Sep 2024

- Designed and shipped the NAU Athletics site and student portal serving the entire campus, UX research, design system, accessibility audit, and ongoing usability and A/B testing.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript (ES6+), TypeScript, C++, SQL, HTML5, CSS3 | **Frontend:** React, Node.js, Electron, Vite, responsive design, WCAG accessibility, Figma, WordPress | **Backend & Data:** Flask, REST APIs, ETL pipelines, MySQL, PostgreSQL, MongoDB Atlas, pandas, NumPy, Jupyter | **ML & AI:** scikit-learn (Logistic Regression, SVM, TF-IDF), RAG pipelines, LLM integration (Gemma) | **Tools:** Git/GitHub, Agile/Scrum, Adobe Creative Suite, Canva, Microsoft 365, Slack

LEADERSHIP

- President, ACM-Women — *North American University*** 2025 – Present
Ran technical workshops on data science, applied AI, and CS fundamentals; mentored 50+ students on skill-building and career strategy; organized hackathon participation and outreach events.
- Leader, Google Developer Student Club — *Google Cloud*** 2024 – Present
Launched the GDSC chapter at NAU; organized virtual workshops and events on emerging technologies and developer tools for students and faculty.
- Student Ambassador — *World U (world.org)*** 2025 – Present
Competitively selected as a paid ambassador for World U, a Sam Altman co-founded program focused on human identity and verification in the age of AI. Plan and execute campus events, introduce students to proof-of-personhood technology, and represent the program at NAU.
- Student Ambassador — *Girls Who Code*** 2025
Delivered Python workshops and guided students through hands-on, data-driven projects; focused on building foundational programming intuition for beginners.
- President, Design Club — *North American University*** 2024
Led instruction on design principles, Figma, Canva, and Adobe Creative Suite tools. Mentored 20+ members and coordinated campus creative events, emphasizing visual communication and audience-focused storytelling.
